# FERTINET.

Installing the FortiFone FF-70E

Expansion Module for the FON-370i/470i

Up to two expansion modules are supported on a single phone.

Box includes

|		4 screws	RJ12 cable
Expansion module	Stand	Connecting bracket	Installation guide

## Connecting the module to the phone

⚠️ Before installing the FF-70E module, unplug the power supply and LAN cable.

1. Place the connecting bracket on the phone and secure it with the screws.

2. Place the expansion module on the other side of the connecting bracket and secure it with the remaining screws.
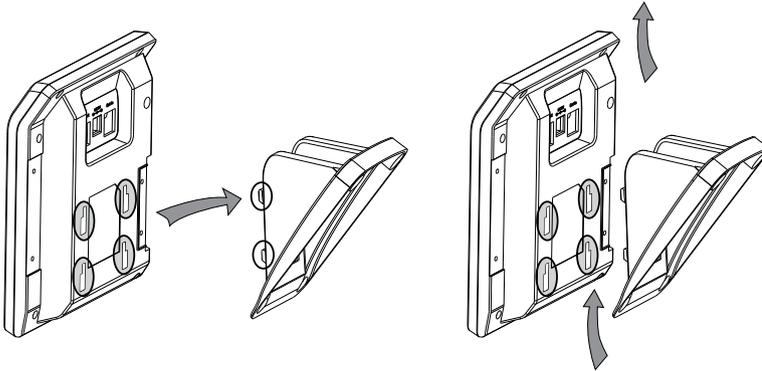

3. Connect the RJ12 cable to the *EXT* port on the phone and the *Ext in* port on the expansion module.

4. To add a second expansion module, use the connecting bracket and screws to secure the second module to the first. Connect the RJ12 cable to the *Ext out* port on the first module and the *Ext in* port on the second.

Connecting the stand

Attach the stand as shown below:
