Expansion module	Stand	Connecting bracket
	Screws	Connecting cord
		Installation guide

Connecting the module to the phone

⚠ Before installing the FF-E570 module, unplug the power supply and LAN cable.

1. Place the connecting bracket on the phone and secure it with the screws.

2. Place the expansion module on the other side of the connecting bracket and secure it with the remaining screws.
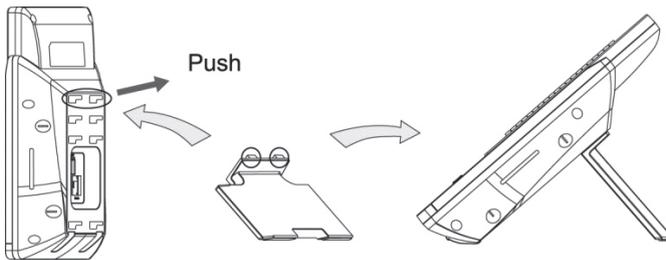

3. Use the connecting cord to connect the *EXT* port on the phone and the *Ext in* port on the expansion module.

4. To add a second expansion module, use the connecting bracket and screws to secure the second module to the first. Use the connecting cord to connect the *Ext out* port on the first module to the *Ext in* port on the second.

Connecting the stand

Attach the stand as shown below:
